

# Capability Statement

## Company Overview

Clearmont Technologies is an **IT Staffing & Recruiting** firm that offers contract, contract-to-hire, and direct hire. We provide a careful and thorough assessment of your requirements and culture to help provide the right candidate. Founded 2013.

Jodi Kulek Mayer is a twenty-eight year IT Staffing Veteran and founder of Clearmont Technologies, a WBENC-Certified Women's Business Enterprise. Over the years she has placed hundreds of IT people as both employees and consultants at companies in financial, consumer product, non-profit, hospitals, real estate, and insurance industries.

## Core Competencies

IT Staffing & Recruiting Services:

- **Software/Web Development:** C# .NET, Java/J2EE, C++, Software Architect, Web & Mobile App Development, UI/UX Designer/Developer, Full Stack Developer, Application Support

## Differentiators

Clearmont Technologies is a true partner focused on your success.

- Understand nuanced position requirements
- Learn a client's culture for the right fit
- Save hiring managers' time by finding and screening the right candidates, narrowing down to the top 2 or 3
- Build a pipeline of candidates for quick turnaround
- Develop and maintain relationships in the candidate market by offering free training to the job-seeking community which brings goodwill, referrals, and intel

## Past Performance

We have placed hundreds of technologists, here is a brief sampling:

- Provided an Automation Engineer to design and deploy automation for on-prem and cloud infrastructure at an insurance firm
- Provided a UI/UX Designer/Developer to develop a product that moved the contract negotiation process away from Excel to a user-friendly, fast web application at a global consumer products firm
- Provided a Storage & Backup Engineer to automate manual storage intervention to provision storage to the server at an insurance firm
- Provided a Data Analyst to automate manual data handling by developing and coding an algorithm in Python at a benefits provider
- Provided a Network Engineer to assess Wi-Fi coverage, identify gaps and develop a remediation plan at an insurance firm
